

7th December 2010
New Brunswick, NJ

Workshop on the Impact of REACh and CLP Regulations on Companies Exporting Chemicals to the EU

On December 7th, 2010, H2 Compliance, Dublin, Ireland in partnership with SafeBridge Consultants, Inc., Mountain View, California will be offering a Workshop on the impact of the Registration, Evaluation and Authorization of Chemicals (REACh) and Classification, Labeling and Packaging (CLP) [Europe's response to the Global Harmonization System or GHS] regulations.

These regulations are in place now and will have an effect on chemical, pharmaceutical, diagnostic, health care and consumer product companies exporting a hazardous chemical ingredient in any quantity or a substance that is subject to REACh registration into the EU. In particular, regulatory compliance will require US companies to modify their Safety Data Sheets (SDSs, formerly called MSDSs), hazard warning labels and also requires notification of importation into Europe and/or manufacture in Europe of any hazardous substances under CLP. Regulatory compliance may also require an exposure assessment be done for environmental and occupational health purposes for high volume chemicals that will need to be appended to the SDS.

If your company ships products or active pharmaceutical ingredients into Europe, you will want to attend this Workshop as regulatory deadlines are approaching.

Be Prepared for the Impact of Classification, Labeling and Packaging on Your Business!

This workshop will make sure you know all the facts and how to manage the regulatory deadlines.

To register: Please call or email Gail Baer to reserve your space before December 2, 2010 (650) 961-4820 Ext. 223 or gail.baer@safebridge.com.

Half Day Workshop

| | |
|----------|---|
| 8:00 am | Coffee & Registration |
| | <ul style="list-style-type: none">• REACh Update & Introduction to the CLP Regulation• What does CLP cover?• What CLP registration & SDS development mean for US chemical exporters• Important questions about applicability and requirements of CLP for pharmaceuticals• Highlights of other international• "REACh and CLP-like" regulations and impact to US companies• How does the CLP Dossier registration process work?• Exposure assessment Advanced REACh Tool (ART)• Q&A |
| 12:30 pm | Networking Lunch (provided) |

With limited time remaining until the critical deadline for CLP, it is essential that US companies fully prepare for the impact this new legislation will have on their business.

What Attendees Will Learn:

- What are the key steps in the CLP and SDS process
- Which chemical substances will be affected
- What CLP means for finished goods
- How to perform exposure assessment for the Pharmaceutical Industry
- What to do if a substance you produce is a Substance of Very High Concern (SVHC) on the "Candidate List"
- What special considerations will US companies need to address

Upon completion of this workshop you will gain a solid working overview of the registration process including:

- The overall purpose and scope of CLP regulation
- The key requirements and activities to meet your CLP and SDS obligations
- The role of the different actors within the supply chain

Who Should Attend:

Manufacturers, importers and downstream users of chemicals, including:

- Specialists, business and regulatory managers working in companies that make or export chemicals to the EU
- Compliance professionals responsible for managing registration in the EU
- Users of chemicals throughout the supply chain

Cost to Attend:

| | |
