

The Premier Resource for High Level Safety, Health and Environmental Support

We provide the “Potent Compound Safety Triangle”
of services to support the safe manufacture of
pharmaceutical chemicals and products.

Industrial Hygiene Analytical Chemistry

- Sensitive analytical methods as low as picograms/filter
- HPLC/RIA/ELISA methodologies
- Air and surface limit methods
 - Validation
 - Sample analysis

Potent Compound Safety Triangle

Toxicology

- Occupational Exposure Limits (OELs)
- Categorization/Banding
 - Risk Assessment
 - MSDSs
- Environmental Fate & Effects Studies

Industrial Hygiene

- Containment verification
- Air monitoring/Data interpretation
 - Project management
- Design and implementation of controls
 - Potent compound training

Three Offices to Serve You!
